

The Warne Lab at Southern Illinois University is seeking a highly motivated graduate student (M.S. or PhD) to work on a funded study exploring the ecology of ranaviruses among amphibian communities. Research in the lab focuses on animal physiological ecology with specific projects testing how environmental conditions shape resource allocation, disease processes, and ecological community interactions.

The start date for the position is January 1, 2018. Apply by October 16th for full consideration. For inquiries or to apply, please send a cover letter and CV to Dr. Robin Warne (rwarne@siu.edu).

More information can be found at <http://warnelab.weebly.com/>.
