Closing Date: 05-25-2020

Application Website: https://www.usajobs.gov/GetJob/ViewDetails/567348300

Position Description: Post-doctoral position assisting USGS Brown Treesnake Project Principal Investigators in the development, implementation, analysis, and write-up of projects related to brown treesnake and other reptile management on Guam. The selected candidate will have opportunity to lead grants and research agreements and assist with other projects, resulting in first authored or co-authored publications for motivated individuals. The individual will coordinate with a large team of trained professional field staff, as well as federal, university, local, and other cooperators.

For candidates not currently living on Guam post differential pay will be applied to salary (salary range: $72,086-$80,011).

Submit applications to USAJOBS, if interested. Potential applications can contact Melia Nafus (mnafus@usgs.gov) or Robert Reed (reedr@usgs.gov) with project questions or the provided HR liaison for questions related to the federal application process.

Preferred Experience: A PhD is preferred, including experience with scientific writing, project development, and statistical analysis. Preference will be given to candidates with a history of publishing scientific manuscripts or periodicals, particularly on topical areas relevant to herpetology and wildlife management.
