

Director of the Conservation Research Bridge Program at the Amphibian Foundation

The Amphibian Foundation is hiring a permanent, full-time, Director to lead the **Conservation Research Bridge Program**. This role includes leading multiple research initiatives and mentoring a diverse group of adult students, who wish to gain valuable and career-building experience working hands-on in the field and in the lab. AF initiatives are focused primarily on conservation programs targeting the Southeastern US's most imperiled amphibian species.

Research priorities include the Frosted Flatwoods Salamander, Gopher Frog, Striped Newt, Pigeon Mountain Salamander, as well as several urban ecology projects in Atlanta.
